### Activities

The mobility programme includes a few days related with mechanics (the students belong to the Professional Course of Mechatronics Technician) and visits to places and companies in the region. In the other days, the students will carry out Workplace Training (also called internship) in local companies. The teachers publicise this exchange, evaluate the project and disseminate it in the school, other institutions, and the local community. Participants will be able to experience the school's educational environment and enjoy the culture and spaces of that country.

### Objectives

- OI. Internationalise the AEVNP;
- OE. Educating for entrepreneurship;
- OT. Increasing employability.
- OL. Improve language skills;
- OV. Enhancing the value of school;

And also the following objectives: - To carry out on-the-job training (FCT) of the students of the Vocational Education and Training (VET) courses; - To develop English language skills in the student, guiding him/her towards personal fulfilment and successful integration in society, in order to face new dynamics of the labour sector; - To promote the valorisation of learning among VET learners, contributing to an increase in the rate of completion of secondary education and acquisition of a level IV qualification; - To increase the percentage of learners who, after completing the course, work in professions directly related to the VET area they have completed.
